## 11<sup>th</sup> ICGLR-OECD-UN GoE Forum on Responsible Mineral Supply Chains

2-4 May 2017, OECD, Paris

## ■ About the OECD

The Organisation for Economic Co-operation and Development (OECD) is a forum in which governments compare and exchange policy experiences, identify good practices in light of emerging challenges, and promote decisions and recommendations to produce better policies for better lives. The OECD's mission is to promote policies that improve economic and social well-being of people around the world.

## ■ About the ICGLR

The International Conference on the Great Lakes Region (ICGLR) is an inter-governmental organization of the countries in the African Great Lakes Region. Its establishment was based on the recognition that political instability and conflicts in these countries have a considerable regional dimension and thus require a concerted effort in order to promote sustainable peace and development.

## ■ About the United Nations Group of Experts (UN GoE)

The UN GoE for the Democratic Republic of Congo (DRC) was established by Resolution 1533 (2004) to monitor the implementation of the UN Security Council sanctions regime for the DRC. The GoE is composed of experts who conduct investigations in areas where armed groups are active, including into political and military leaders of armed groups, individuals and entities illegally supporting armed groups through illicit trade of natural resources, elements of state security forces engaged in illegal natural resource exploitation and due diligence implementation with regard to natural resources.

## ■ About the OECD Due Diligence Guidance

The [OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas](#) (OECD Mineral Due Diligence Guidance) provides detailed recommendations to help companies respect human rights and avoid contributing to conflict through their mineral purchasing decisions and practices. The OECD Due Diligence Guidance is for use by any company potentially sourcing minerals or metals from conflict-affected and high-risk areas. It is one of the international frameworks available to help companies meet their due diligence reporting requirements. This Guidance builds on the broader recommendations on responsible business conduct set out in the OECD Guidelines for Multinational Enterprises.
